

PRODUCT & TECHNICAL DATA

LMX GREASE Lithium Complex

DESCRIPTION

Castrol LMX is a high temperature grease for applications in the Marine and Offshore Industries where severe operating conditions necessitate an improvement over standard lithium greases.

FEATURES/BENEFITS

This product is a lithium complex grease of NLGI No.2 consistency having extreme pressure properties and inhibited against oxidation and corrosion.

TECHNICAL DATA

Typical Characteristics	Castrol LMX
Base	Lithium Complex
Worked Penetration, 0.1mm	273
Mineral Oil Viscosity @ 40°C	180
Drop Point, °C	250
Recommended Operating Temperatures min/max, °C	-30/+170
Colour	Dark Brown
Additives	Extreme Pressure, Corrosion and Oxidation Inhibitors
NLGI Number	2
