## SEAMAX EXTRA SERIES

### DESCRIPTION

Castrol Seamax Extra 30 and 40 is a new range of 15BN engine oils specifically developed for the arduous conditions of use experienced in the today's fishing industry. The range is suitable for use in modern highly rated four-stroke engines operating on marine distillate fuels.

This range of high performance lubricants has been formulated using the highest quality base oils and a unique balance of additives to offer both economic and operational benefits.

Castrol Seamax Extra is available in both SAE 30 and 40 viscosity grades.

### FEATURES/BENEFITS

The diesel engine performance of the Castrol Seamax Extra range exceeds the API CF specification, offering enhanced detergency, excellent thermal and oxidative stability and enhanced performance at high temperatures. The series also exhibits high load carrying capabilities and superior gear performance which enables it to be used as a common oil for both engine and transmission systems.

The superior performance of Castrol Seamax Extra leads to reduced cost of use through:

- reduced maintenance and wear
- excellent engine cleanliness
- extended time between overhauls
- cleaner piston ring belts
- improved resistance to liner lacquering

### TECHNICAL DATA

Typical Characteristics	Seamax Extra 30	Seamax Extra 40
Density at 15°C, kg/ltr	0.89	0.89
Viscosity at 100°C, cSt	11.5	13.5
SAE Number	30	40
Base Number	15	15
Closed Flash Point, °C	>200	>200
Pour Point, °C	-12 or below	-12 or below
<b>Typical load carrying capacity</b> FZG Gear Test (A/8.3/90), FLS	12	12
