The Company makes provision for the future cost of decommissioning storage tanks on a discounted basis. These costs are expected to be incurred 30 to 50 years. The provision has been estimated using existing technology at current prices, escalated between 10.3% - 11% (2017: 10.3%-11%) and discounted between the range of 12.8% - 16.2% (2017: 12.8% - 16.2%). The economic life and the timing of the asset retirement obligation are dependent on Government legislation, commodity price and the future production profiles of the project. In addition, the estimated cash outflows are subject to inflationary and/or deflationary pressures. No such assets were acquired in 2018.
